A Western history of definitions & preferences According to the Oxford English Dictionary, the word "rare," counterbalancing "done" describing the doneness of meat, descends from the word "rear," meaning imperfectly cooked or underdone. The original culinary use described eggs. The earliest print reference to the word "rare" relating to meat cookery is circa 1615. The term "homeopathy" was coined by Hahnemann and first appeared in print in 1807. Hahnemann conceived of homeopathy while translating a medical treatise by the Scottish physician and chemist William Cullen into German. Being sceptical of Cullen's theory concerning cinchona's use for curing malaria, Hahnemann ingested some bark specifically to investigate what would happen.
