Emil Kraepelin (/ ˈ k r ɪ p ɪ n /; German: [ˈeːmiːl ˈkʁæpəlɪn]; 15 February 1856 – 7 October 1926) was a German psychiatrist. H. J. Eysenck's Encyclopedia of Psychology identifies him as the founder of modern scientific psychiatry, psychopharmacology and psychiatric genetics.. Kraepelin believed the chief origin of psychiatric disease to be biological and genetic malfunction.Mind Soc DOI 10.1007/s11299-016-0188-1 A recap on Italian neurolaw: epistemological and ethical issues Elisabetta Sirgiovanni1 • Gilberto Corbellini1 • Cinzia Caporale2 Received: 24 June 2015 / Accepted: 29 December 2015 Springer-Verlag Berlin Heidelberg 2016 Abstract Italy is in the forefront of forensic neuroscience practice among European nations.Academia.edu is a platform for academics to share research papers.This reference list was compiled by Robert Hare for personal use. Most, but not all, of the articles listed on these pages discuss or evaluate the PCL-R, the PCL:SV, the PCL:YV, and other Hare Scales.Links to available abstracts, and when available, links to the full text on the Journal web sites are provided (search for [full text] on the page below). - Classifying Madness A Philosophical Examination Of The Diagnostic And Statistical Manual Of Mental Disorders Philosophy And Medicine
