

Download Drug Abuse Prevention Intervention Research: Methodological Issues

We did a systematic review of reviews with evidence on the effectiveness of prevention, early intervention, harm reduction, and treatment of problem use in young people for tobacco, alcohol, and illicit drugs (eg, cannabis, opioids, amphetamines, or cocaine). Taxation, public consumption bans, advertising restrictions, and minimum legal age are effective measures to reduce alcohol and tobacco ...Importance Relapse is highly prevalent following substance abuse treatments, highlighting the need for improved aftercare interventions. Mindfulness-based relapse prevention (MBRP), a group-based psychosocial aftercare, integrates evidence-based practices from mindfulness-based interventions and cognitive-behavioral relapse prevention (RP) approaches.(1) The use of human subjects in research. Research with human subjects involves a well-documented set of ethical and legal issues, associated with many different types of scientific studies and investigations, including experimental, field, and clinical research, surveys, observational studies, and interviews (Levine, 1986; Sieber, 1992b; Stanley and Sieber, 1992). Projects. On this page you can access all the descriptions of completed projects and projects currently underway at NPC Research. In the search field, enter a title or key word, or from the drop-down menu choose an NPC staff member, a topic area, a status (complete or current), or a geographic location or jurisdiction (i.e., TR = Tribal). - Drug Abuse Prevention Intervention Research: Methodological Issues
