Dr. Croom's Classroom resource site. A place to find notes, problems, worksheets, links, and other information about class. Its focus is on physics but it has links to Math and other science material created by J Croom. This Site is designed and updated by John Croom III, Ed.D., J Croom Instructor: Damien Howard Damien has a master's degree in physics and has taught physics lab to college students. What is Motion? Motion in physics refers to the changes in position of an object over time. We usually describe motion using various numbers and terms, like displacement or distance, velocity or ... These operators will "operate" on a wave function, Ψ , which is assumed to exist, and which is assumed to contain all that is knowable about the quantum mechanical system. We would then solve the resulting equation to get the particulars. And so, in this example, we can write the substitutions into the classical expression for total energy. - Holt Physics Test Rotational Motion Answers
