

Download Managing Habitats For Conservation

Providing a comprehensive habitat-by-habitat guide to conservation management based on scientific principles as well as practical experience, this volume directs the reader through options and solutions. It highlights potential problems and provides examples of past habitat management. The Department of Fish and Wildlife manages California's diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment by the public. This comprehensive volume provides a pragmatic, habitat by habitat guide to conservation management, in which the prescriptions and methods are based upon sound science coupled with practical experience. Biodiversity Conservation and Habitat Management is a component of Encyclopedia of Natural Resources Policy and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. - Managing Habitats For Conservation
