Disease in colonial America that afflicted the early immigrant settlers was a dangerous threat to life. Some of the diseases were new and treatments were ineffective. Malaria was deadly to many new arrivals, especially in the Southern colonies. Of newly arrived able-bodied young men, over one-fourth of the Anglican missionaries died within five years of their arrival in the Carolinas. Vaccine hesitancy is a reluctance or refusal to be vaccinated or to have one's children vaccinated. Identified by the World Health Organization as one of the top ten global health threats of 2019, it contradicts overwhelming scientific consensus about the safety and efficacy of vaccines.. Hesitancy results from public debates around the medical, ethical and legal issues related to vaccines. Introduction. Thomas Kuhn coined the modern definition of the word “paradigm” in *The Structure of Scientific Revolutions*, published in 1962. A paradigm, according to Kuhn's definition, is a conceptual model that explains a set of scientific observations, which creates a framework to fit the observations. Southern University and A&M College, an Historically Black, 1890 land-grant institution, provides opportunities for a diverse student population to achieve a high-quality, global educational experience, to engage in scholarly, research, and creative activities, and to give meaningful public service to the community, the state, the nation and the world. - *Medicine And The American Revolution : How Diseases And Their Treatments Affected The Colonial Army*
