This solution manual is definitely worth the price. Having the answers for all the problems in the textbook helped me understand the material much more efficiently and thoroughly. Miessler and Tarr are the standard for Inorganic Chemistry. Whether you are a professor or a student you should be using Miessler and Tarr for Inorganic Chemistry. 1. An acid dissociation constant, K_a , (also known as acidity constant, or acid-ionization constant) is a quantitative measure of the strength of an acid in solution. It is the equilibrium constant for a chemical reaction known as dissociation in the context of acid–base reactions. In aqueous solution, the equilibrium of acid dissociation can be written symbolically as:
